

CYBERSAFETY PRESENTATION

YEAR 3 – YEAR 6

Dear Parents/Guardians,

Our school is an eSmart accredited school which means that we endeavour to integrate cyber safety practices in our curriculum and promote the safe use of online technology in our community. This year we have decided to provide our students with the opportunity to be involved in a presentation by Brett Lee the founder of Cybersafe Education.

Brett Lee worked as a Queensland Police Officer for 22 years, 16 of which were as a detective in the field of Child Exploitation. Brett has been personally involved with the interview, location, arrest and prosecution of hundreds of online criminals and predators.

The Cybersafe presentations equip students with the skills and knowledge necessary to use the internet safely, creating an awareness of their rights and responsibilities in the digital world. This is achieved through dynamic and engaging presentations targeting empowerment, awareness and self-esteem.

For more information on the presentation and presenter see the attached brochure.

Date of Presentation: Tuesday 13th March

Cost: \$12.00

The due date for payment is Monday 5th March, payments will not be accepted after this date.

Mrs Joyce Hickling
eLearning Co-ordinator

Customised Sessions

Every training session delivered by INESS is tailor made to your individual requirements including:

Length of Sessions
Audience Size
Content & Topics
Year Levels

Our Primary School presentations equip younger students with the skills and knowledge necessary to use the internet safely, creating an awareness of their rights and responsibilities in the digital world. This is achieved through dynamic and engaging presentations targeting empowerment, awareness and self-esteem.

We help to make a difference and create a positive mindset change when it comes to young children and technology. In our complex digital world we believe this IS achievable. Our aim is to build upon and reinforce the valuable messages that are already being imparted by schools and parents by making these messages real to students.

“We create a positive change of mindset when it comes to young children and technology through real and credible messages that can’t be denied.”

Testimonial

Andrew Bell

Deputy Headmaster / St Jude's Primary School

The presentations were structured to the different class groups during the day. They also commented that in some instances where a parent had children across the different year levels, that the children were discussing their individual sessions and exchanging information, telling each other the different things they had learnt to look out for whilst on the internet.

Primary School Presentations

Topics include:

- What is Cyberbullying?
- The importance of protecting my password.
- Why there will always be rules for technology.
- Who are people on the internet, strangers and friends ?
- My online identity and the importance of protecting it.
- How private is the internet ?
- My online rights and responsibilities.
- Who can help me with my online problems ?
- What happens to my online pictures and words ?

Up to Date Content

The primary school program is delivered by credible and professional presenters knowing that every child is at a differing level of online development and maturity. Having hundreds of examples, photos, real life stories and videos allows ISE to create a presentation to address your specific requirements and duty of care needs.

About Internet Safe Education

ISE creator, Brett Lee, worked as a Queensland Police Officer for 22 years, 16 of those as a Detective predominantly in the field of Child Exploitation. In his last five years of service, he was a specialist in the field of undercover internet child exploitation investigations.

Brett has been personally involved in the online investigation, arrest and prosecution of numerous offenders, whose medium for preying on children is the internet. Further to Brett's experience, he has completed the FBI Advanced Internet Investigations Course and has worked with the FBI Innocent Images Unit, Maryland USA, the Department of Homeland Security Cyber Crimes Centre, Virginia USA and the San Jose Internet Crimes Against Children Task Force, California USA.
