

Legoland Discovery Centre

An all day excursion to the Legoland Discovery Centre has been organised for the Foundation students. The purpose of the excursion is to extend student's knowledge of the way objects move depending on a variety of factors including their size and shape.

At Legoland, the students will build a Lego spinning top, collect data on whose design spins longest, and learn about forces that affect their top's performance. They will also have time to explore the Discovery Centre.

It is expected that all students will attend as this day is part of the learning program.
